Material Safety Data Sheet AIR LIQUIDE

BLUESHIELD™ 9

Product and company identification 1.

Product name	: BLUESHIELD™ 9
Material uses	: Shielding gas for arc welding.
Supplier/Manufacturer	: Air Liquide Canada Inc. 1250, René-Lévesque West, Suite 1700 Montreal, QC H3B 5E6 www.airliquide.ca 1-800-817-7697
Prepared by	: IHS
In case of emergency	: (514) 878-1667

Hazards identification 2.

Physical state	: Gas.
Color	: Colorless.
Odor	: Odorless.
Emergency overview	
Signal word	: CAUTION!
Hazard statements	HIGH PRESSURE GAS. GAS REDUCES OXYGEN AVAILABLE FOR BREATHING. CONTAINS MATERIAL THAT MAY CAUSE TARGET ORGAN DAMAGE, BASED ON ANIMAL DATA.
Precautions	Contains gas under pressure. In a fire or if heated, a pressure increase will occur and the container may burst or explode. At very high concentrations, can displace the normal air and cause suffocation from lack of oxygen. Do not puncture or incinerate container. Do not enter storage areas and confined spaces unless adequately ventilated. Avoid breathing gas. Use only with adequate ventilation. Keep container tightly closed and sealed until ready for use.
Routes of entry	: Dermal contact. Eye contact. Inhalation.
Potential acute health effe	<u>cts</u>
Inhalation	: At very high concentrations, can displace the normal air and cause suffocation from lack of oxygen.
Ingestion	: As this product is a gas, refer to the inhalation section.
Skin	: Contact with rapidly expanding gas may cause burns or frostbite.
Eyes	: Contact with rapidly expanding gas may cause burns or frostbite.
Potential chronic health ef	fects
Chronic effects	: Contains material that may cause target organ damage, based on animal data.
Carcinogenicity	: No known significant effects or critical hazards.
Mutagenicity	: No known significant effects or critical hazards.
Teratogenicity	: No known significant effects or critical hazards.
Developmental effects	: No known significant effects or critical hazards.
Fertility effects	: No known significant effects or critical hazards.

6/1/2014.

Canada

2. Hazards identification

Target organs

exposure

: Contains material which may cause damage to the following organs: lungs, cardiovascular system, upper respiratory tract, central nervous system (CNS).

Over-exposure signs/symptoms

Inhalation	: No
Ingestion	: No
Skin	: No
Eyes	: No
Medical conditions	: Pre
aggravated by over-	risk

Pre-existing disorders involving any target organs mentioned in this MSDS as being at risk may be aggravated by over-exposure to this product.

3. Composition/information on ingredients

specific data. specific data. specific data. specific data.

Name	CAS number	%
helium	7440-59-7	60-97
argon	7440-37-1	2-25
Carbon dioxide	124-38-9	1-15

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

4. First aid measures

Eye contact		remove any contact lenses. Immediately flush eyes with plenty of water minutes, occasionally lifting the upper and lower eyelids. Get medical diately.			
Skin contact	while removing	n case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Cle shoes thoroughly before reuse. Get medical attention immediately.			
Inhalation	respiratory arre	person to fresh air. If not breathing, if breathing is irregular or if est occurs, provide artificial respiration or oxygen by trained personnel. othing such as a collar, tie, belt or waistband. Get medical attention			
Ingestion	: As this product	As this product is a gas, refer to the inhalation section.			
Protection of first-aiders	suspected that self-contained	No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.			
Antidote information					
Product/ingredient name		Antidote information			
No antidote information know	vn				
Notes to physician	: No specific treat	atment. Treat symptomatically. Contact poison treatment specialist			

immediately if large quantities have been ingested or inhaled.

5. Fire-fighting measures

Flammability of the product	1	Contains gas under pressure. In a fire or if heated, a pressure increase will occur and the container may burst or explode.
<u>Extinguishing media</u>		
Suitable	:	Use an extinguishing agent suitable for the surrounding fire.
Not suitable	1	None known.
Special exposure hazards	:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist advice. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Hazardous thermal decomposition products	:	Decomposition products may include the following materials: carbon dioxide carbon monoxide
Special protective equipment for fire-fighters	:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. Accidental release measures

Personal precautions	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Avoid breathing gas. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8). If leak is in user's equipment, be certain to purge piping with an inert gas prior to attempting repairs. Never fix a leak while the system is under pressure. If leak is on container or container valve, contact the closest Air Liquide Canada location.
Environmental precautions	-	Ensure emergency procedures to deal with accidental gas releases are in place to avoid contamination of the environment. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for cleaning up		
Small spill	:	Immediately contact emergency personnel. Stop leak if without risk.
Large spill	:	Immediately contact emergency personnel. Stop leak if without risk. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

7. Handling and storage

Handling
 Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Contains gas under pressure. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Valve protection caps must remain in place unless cylinder is secured with valve outlet piped to usage point. Do not drag, slide or roll cylinders. Use a suitable hand truck for cylinder movement. Use a pressure regulator when connecting cylinder to lower pressure piping or systems. Do not heat cylinder by any means to increase the discharge rate of product from the cylinder. Use a check valve or trap in the discharge line to prevent hazardous back flow to the cylinder. Do not tamper with (valve) safety device. Close valve after each use and when empty.

7. Handling and storage

Storage

: Protect cylinders from physical damage. Store in cool, dry, well-ventilated area of non combustible construction away from heavily trafficked areas and emergency exits. Do not allow the temperature where cylinders are stored to exceed 52°C/125°F. Cylinders must be stored upright and firmly secured to prevent falling or being knocked over. Full and empty cylinders should be segregated. Use a "first in - first out" inventory system to prevent full cylinders being stored for excessive periods of time. Store in accordance with local regulations. Store in a segregated and approved area. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Protect from sunlight. Keep container tightly closed and sealed until ready for use.

8. Exposure controls/personal protection

Occupational exposure limits		TWA (8 hours)			STEL (15 mins)			Ceiling			
Ingredient	List name	ppm	mg/m³	Other	ppm	mg/m³	Other	ppm	mg/m³	Other	Notations
	US ACGIH 6/2013 AB 4/2009 BC 7/2013 ON 1/2013 QC 12/2012	5000 5000 5000 5000 5000	9000 9000 - 9000 9000	- - - -	30000 15000 30000	54000 54000 - 54000 54000	- - -	- - - -	- - - -	- - -	[2]

[2]Oxygen Depletion [Asphyxiant]

Consult local authorities for acceptable exposure limits.

6/1/2014.	Canada	4/8
Hands	: Chemical-resistant, impervious gloves complying with an approved standard sh- worn at all times when handling chemical products if a risk assessment indicate necessary. Considering the parameters specified by the glove manufacturer, cl during use that the gloves are still retaining their protective properties. It should noted that the time to breakthrough for any glove material may be different for d glove manufacturers. In the case of mixtures, consisting of several substances protection time of the gloves cannot be accurately estimated.	s this is neck be ifferent
Personal protection Respiratory	: Use a properly fitted, air-purifying or air-fed respirator complying with an approvistandard if a risk assessment indicates this is necessary. If operating condition high gas concentrations to be produced or any recommended or statutory experies exceeded, use an air-fed respirator or self-contained breathing apparatus. The can cause asphyxiation without warning by replacing the oxygen in the air. Res selection must be based on known or anticipated exposure levels, the hazards of product and the safe working limits of the selected respirator.	s cause sure limit ne gas pirator of the
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, b eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated cloth Wash contaminated clothing before reusing. Ensure that eyewash stations and showers are close to the workstation location.	hing.
Engineering measures	: Use only with adequate ventilation. Use process enclosures, local exhaust vent other engineering controls to keep worker exposure to airborne contaminants be recommended or statutory limits.	elow any
Recommended monitoring procedures	: If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiven the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring sta Reference to national guidance documents for methods for the determination of hazardous substances will also be required.	ndards.

8. Exposure co	ntrols/personal protection
Eyes	: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
Skin	 Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Environmental exposure controls	: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

9. Physical and chemical properties

Physical state	: Gas.
Flash point	: Not available.
Auto-ignition temperature	: Not available.
Flammable limits	: Not available.
Color	: Colorless.
Odor	: Odorless.
рН	: Not available.
Boiling/condensation point	: Not available.
Melting/freezing point	: Not available.
Density	: 0.2285 to 0.8473 g/l
Vapor pressure	: Not available.
Vapor density	: Not available.
Odor threshold	: Not available.
Evaporation rate	: Not available.
Viscosity	: Not available.
Solubility	: Partially soluble in the following materials: cold water.
LogKow	: Not available.

10. Stability and reactivity

Chemical stability	: The product is stable.
Conditions to avoid	: No specific data.
Incompatible materials	: No specific data.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
	Under normal conditions of storage and use, hazardous polymerization will not occur.

11. Toxicological information

Acute toxicity

Not available.

Chronic toxicity

Not available.

Irritation/Corrosion

Not available.

<u>Sensitizer</u>

Not available.

Classification

Not available.

Mutagenicity

Not available.

Teratogenicity

Not available.

Reproductive toxicity

Not available.

12. Ecological information

Ecotoxicity	: No known significant effects or critical hazards.
Aquatic ecotoxicity	
Not available.	
Persistence/degradability	
Not available.	
Partition coefficient: n-	: Not available.
octanol/water	
Bioconcentration factor	: Not available.
Mobility	: Not available.
Toxicity of the products of	: Not available.
biodegradation	
Other adverse effects	: No known significant effects or critical hazards.
13. Disposal con	siderations

Waste disposal

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Empty pressure vessels should be returned to the supplier. Waste packaging should be recycled.

Disposal should be in accordance with applicable regional, national and local laws and regulations.
